Generating files with RIS-formatted references in Reference Manager
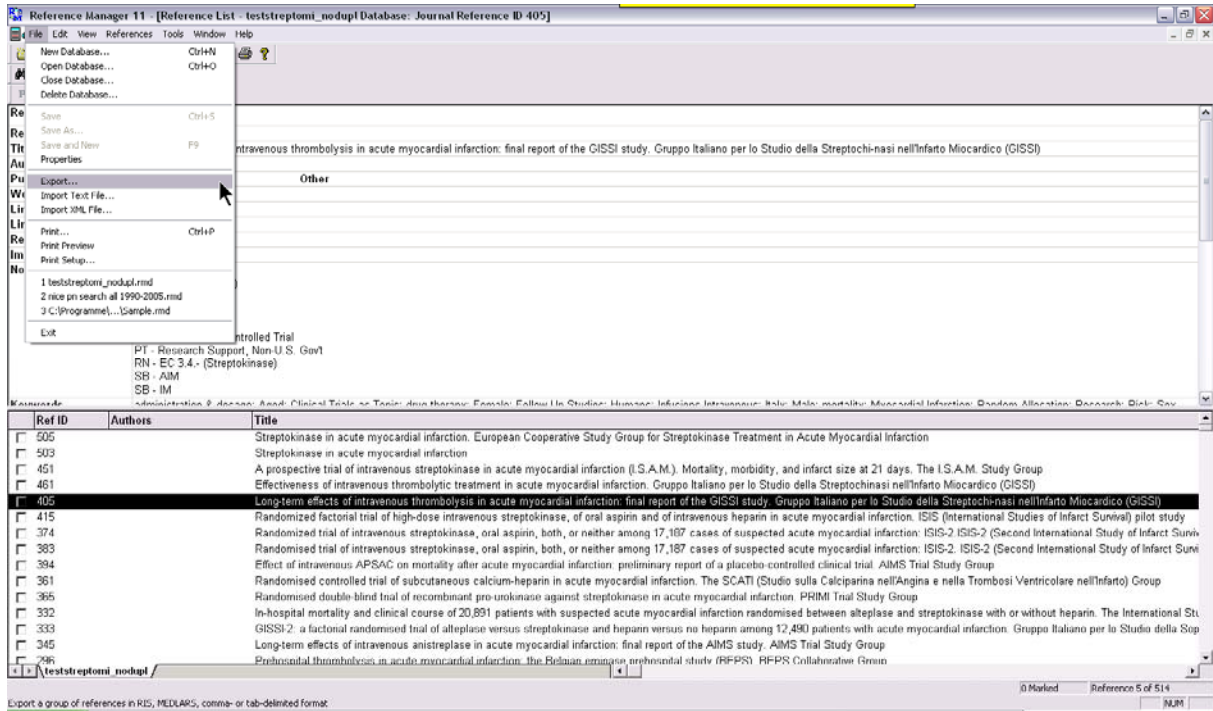

Open your Reference Manager library.
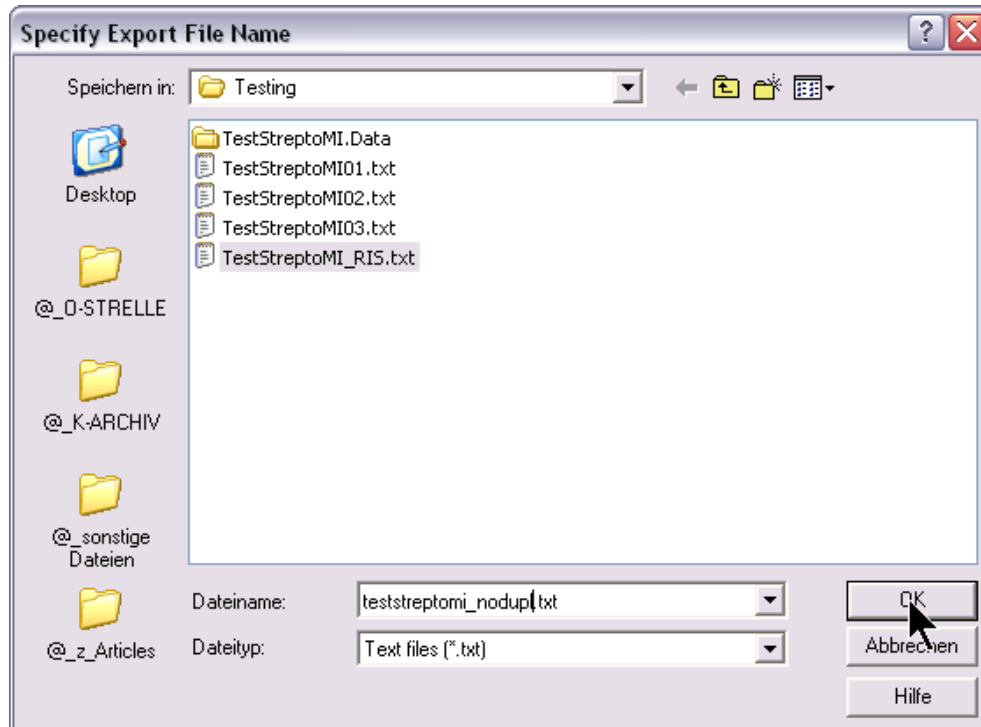

Go to menu: File-Export….

Select "RIS" under "Output format" (orange arrow 1). Select "All references in list" under "References options" if you want to export all references in the library (orange arrow 2). If you want to export only a selection of single references choose the appropriate option. Make sure that you either highlighted them by clicking on them while pressing the Ctrl-key or marked the relevant references (be sure that you understand the difference between highlighting and marking in Reference Manager). Finally, click on the "…" button to define your file-destination (mouse arrow).
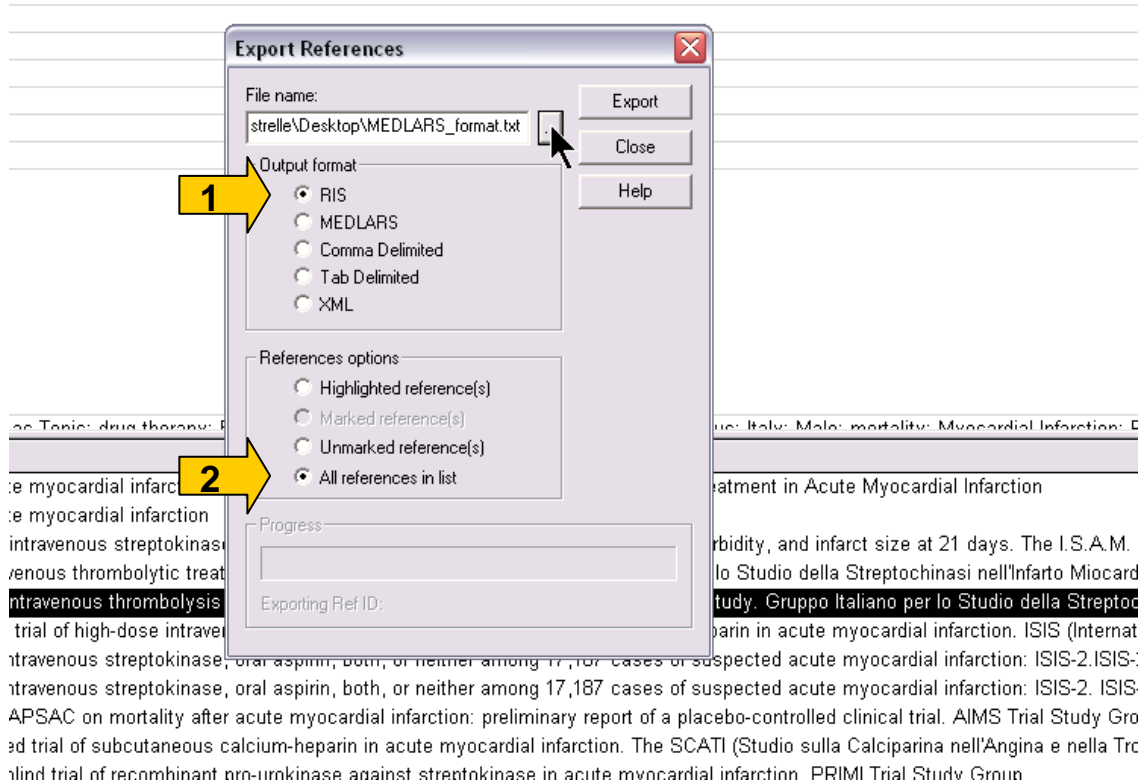

Choose a destination and file name and press the "OK" button.

The text file should look like this

```
TY  - JOUR
ID  - 4
T1  - Title of dummy report
A1  - Smith,R.C.
